YUAN GONZALEZ

Miami, FL | 786-660-5360 | Yuan.Gonzalez001@gmail.com | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Computer Engineering graduate at FIU with experience in data analysis, migration, and technical problem-solving. Skilled in SQL, Power BI, ETL, and Azure, with hands-on experience analyzing business processes, developing reports, automating manual tasks, and supporting data-driven solutions. Familiar with system analysis, technical documentation, and cross-functional collaboration. Reduced processing times by 20% through scripting automation and process optimization. Azure Certified (AZ-900).

TECHNICAL SKILLS & COMPETENCIES

- **Data Analysis & Programming**: SQL, Python, Pandas, NumPy, Data Cleaning, Data Validation, ETL, Azure
- **Business Intelligence & Visualization**: Power BI, DAX, Excel, Power Query, Data Modeling, Dashboard Development, KPI Development, Ad-Hoc & Executive Reporting

PROFESSIONAL EXPERIENCE

Dicomatics (Healthcare Medical Informatics) **Data Migration Engineer** **March 2026 – July 2026**

- Used SQL Server and T-SQL to investigate migration issues, validate study records, troubleshoot database connectivity, and reconcile source-to-target data discrepancies.
- Monitored end-to-end migration pipelines and Grafana dashboards, analyzing import/export rates, success/failure metrics, processing backlogs, and throughput to identify performance bottlenecks.
- Executed data migration workflows for medical imaging environments**,** validating, cleaning, and reconciling large.

NextEra Energy (Florida Power & Light) **Customer Service Representative II** **May 2025 – February 2026**

- Managed customer accounts across multiple billing, payment, and internal database systems, verifying real-time data and resolving complex account discrepancies.
- Audited customer records, billing transactions, and account histories to identify inconsistencies and maintain data accuracy.
- Analyzed business systems and collaborated across departments to identify issues and recommend technical solutions that improved operational efficiency.

Breakthrough Tech / Lead Vizion (FIU) **Data Engineering Intern** **August 2024 – November 2024**

- Designed and programmed scripting automation using Python to analyze data processing functions and activities, automating manual processes and increasing operational efficiency by 20% through intelligent workflow design.
- Performed data validation, testing, and debugging to improve system performance, reliability, and overall application quality.
- Created data quality reports and documented requirements while supporting development teams using Git and GitHub.

TECHNICAL PROJECTS & ACADEMIC CASE STUDIES

Los Angeles Crime Investigation Analytics | Power BI, Advanced DAX, Power Query | GitHub

- Built an interactive Power BI platform enabling investigators to identify case relationships, surface related incidents by offense patterns, and analyze temporal/geographic clusters.
- Engineered advanced DAX calculations for many-to-many offense matching, Haversine distance analysis, and disconnected selectors for flexible investigative analysis.
- Developed KPIs including incident match rate, case linkage depth, and investigation time-to-insight.

Healthcare Performance & Financial Analytics | Power BI, SQL, Python | Github

- Architected an end-to-end analytics platform processing 900K+ clinical records using Power Query, Python (Pandas), and SQL Server to track 15+ healthcare KPIs.
- Analyzed billing and utilization trends across 6 insurance providers, 10 hospitals, and 150 physicians, identifying patterns in healthcare demand, revenue performance, and patient outcomes.
- Designed a star-schema Power BI model measuring patient utilization, clinical outcomes, revenue cycle performance, and financial performance across departments and payers.

EDUCATION & CERTIFICATIONS

Bachelor of Science in Computer Engineering | Florida International University (FIU)

Graduated April 2026 | GPA: 3.5 / 4.0

- Certification: Microsoft Certified: Azure Fundamentals (AZ-900)
